

Founded in 1660, The Royal Society [www.royalsoc.ac.uk](http://www.royalsoc.ac.uk) is the national academy of sciences of the UK and the Commonwealth. The Society plays an influential role in national and international science policy and is dedicated to promoting excellence in science. Fellows of the Royal Society include mathematician and physicist Stephen Hawking; IVF and stem cell research pioneer Anne McLaren and inventor of the worldwide web, Tim Berners-Lee.

The Royal Society publishes seven, high quality peer-reviewed journals covering: biological and physical sciences; history and philosophy of science; and cross-disciplinary research at the interface between the physical and life sciences. [www.pubs.royalsoc.ac.uk](http://www.pubs.royalsoc.ac.uk)

All journals are available in both print and online versions and the subscribers may access fully citable articles up to 10 weeks before publication of the printed journal issue through *FirstCite*,<sup>®</sup> the Royal Society's Early Online Publishing service.
